A brief history of psychiatry. Psychiatry got its name as a medical specialty in the early 1800s. For the first century of its existence, the field concerned itself with severely disordered individuals confined to asylums or hospitals. These patients were generally psychotic, severely depressed or manic, or suffered conditions we would now recognize as medical: dementia, brain tumors, seizures, hypothyroidism, etc.

However, psychiatric disorders evolved long before that. Hunter and Macalpine (3) began their history in the 16th century, but Burton's monumental 1621 treatise describes the origins of "melancholia" in Greek and Roman antiquity, which is confirmed by Jackson's (4) more recent history of melancholia and depression. In the last 25 years James Kinnier Wilson and I have studied earlier Babylonian accounts of neurological and psychiatric disorders, including epilepsy, stroke, psychoses ...
