---

Acoustic and Auditory Phonetics on Apple Books  
Auditory phonetics is a branch of phonetics concerned with the hearing of speech sounds and with speech perception. It thus entails the study of the relationships between speech stimuli and a listener's responses to such stimuli as mediated by mechanisms of the peripheral and central auditory systems, including certain cortical areas of the brain. In more detail, it deals with the possible frequency ranges of human hearing, with the frequency ranges of individual sounds and it investigates ...
